DETAILED ACTION

Applicant's amendment of January 8, 2002 cancelling claims 1-2 and adding new claims 3-10 is acknowledged. Claims 3-10 remain for consideration.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 3,5 and 6, drawn to an austenitic stainless steel that is less susceptible to cracking, classified in class 420, subclass 34.
- II. Claims 4, 7-10, drawn to a method for manufacturing an austenitic stainless steel, classified in Class 75, subclass 508.

Inventions Group I and Group II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, the product could be made by adding silicon-manganese alloy to melted stainless steel.

Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

A telephone call was made to Kent E. Baldauf on 1/7/03 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1742

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
